

Shell Scripting Cheat Sheet for Unix and Linux

Online: http://steve-parker.org/sh/sh.shtml Book: http://steve-parker.org/shellscripting

## File Redirection

| $>$ file | create (overwrite) file |
| :--- | :--- |
| $\gg$ file | append to file |
| $<$ file | read from file |
| $a \mid b$ | Pipe 'a' as input to 'b' |

## Common Constructs

| \$ while read f <br> $>$ do <br> $>$ echo "Line is \$f" <br> $>$ done < file | read text file line by line <br> note: "\$" prompt becomes ">" |
| :---: | :---: |
| \$ grep foo myfile afoo foo foobar | find lines in myfile containing the text "foo" |
| \$ cut -d: -f5 /etc/passwd Steve Parker | get $5^{\text {th }}$ field delimited by colon |
| \$ cmd1 \|| cmd2 | run cmd1; if fails, run cmd2 |
| \$ cmd1 \& cmd2 | run cmd1; if it works, run cmd2 |
| ```case $foo in a) echo "foo is A" ;; b) echo "foo is B" ;; *) echo "foo is not A or B" ;; esac``` | act upon the value of a variable <br> note that ";"" is required at the end of each section |
| myvar=`ıs` | get output of <br> Is into variable |
| ```doubleit() { expr $1 \| 2 } doubleit 3 # returns 6``` | function declaration and syntax for calling it |

## Test Operators

\# do something

$$
\mathrm{fi}
$$

## Numeric Tests

| It | less than |
| :--- | :--- |
| gt | greater than |
| eq | equal to |
| ne | not equal |
| ge | greater or equal |
| le | less or equal |

## File Tests

| nt | newer than |
| :--- | :--- |
| d | is a directory |
| f | is a file |
| x | executable |
| r | readable |
| w | writeable |

## Variable Substitution

| $\$\{V:-$-default $\}$ | \$V, or "default" if unset |
| :--- | :--- |
| $\$\{V:=$ default $\}$ | \$V (set to "default" if unset) |
| $\$\{V: ? e r r\}$ | \$V, or "err" if unset |

## Conditional Execution

| cmd1 \|| cmd2 | run cmd1; if fails, run cmd2 |
| :--- | :--- |
| cmd1 \&\& cmd2 | run cmd1; if ok, run cmd2 |

## Files

| $\mathrm{mv} /$ src /dest | move /src into /dest |
| :--- | :--- |
| Is a* | list files beginning with "a" |
| Is *a | list files ending with "a" |
| Is -ltr | list oldest first, newest last |
| Is -ISr | list smallest first, biggest last |
| Is -a | list all files, including hidden |
| find /src -print I | copy /src into current |
| I cpio -pudvm | directory, preserving |
|  | links, special devices, etc. |

## Preset Variables

## String Tests

| $=$ | equal to |
| :--- | :--- |
| $z$ | zero length |
| n | not zero length |

## Logical Tests

| $\& \&$ | logical AND |
| :--- | :--- |
| $\\|$ | logical OR |
| $!$ | logical NOT |

## Arguments

| $\$ 0$ | program name |
| :--- | :--- |
| $\$ 1$ | $1^{\text {st }}$ argument |
| $\$ 2$ | $2^{\text {nd }}$ argument |
| $\ldots$ | $\ldots$ |
| \$\# | no. of arguments |
| $\$ *$ | all arguments |

| \$SHELL | what shell am I running? |
| :--- | :--- |
| \$RANDOM | provides random numbers |
| $\$ \$$ | PID of current process |
| $\$ ?$ | return code from last cmd |
| $\$!$ | PID of last background cmd |

## Generally Useful Commands

| file /etc/hosts | determine file type |
| :--- | :--- |
| basename /bin/ls | strip directory name (ls) |
| dirname /bin/ls | get directory name (/bin) |
| ifconfig -a | show all network adapters |
| netstat -r | show routers |
| netstat -a | show open ports |
| date $+\% Y \% m \% d$ | Year, Month, Day |
| date $+\% H \% M$ | Hours, Minutes |
| wc -I | count number of lines |
| pwd | present working directory |

Misc Useful Commands and Tools

| egrep "(foo\|bar)" file | find "foo" or <br> "bar" in file |
| :--- | :---: |
| awk '\{ print \$5 \}' file | print the 5 ${ }^{\text {th }}$ word <br> of each line |
| cal 31973 | March 1973 |
| df -h | show disk mounts |
| three=`expr 1+2` | simple maths |
| echo "scale =5 ; I |  |
| $5121 / 1024$ " \| bc | better maths |
| $(5.00097)$ |  |
| time cmd | stopwatch on cmd |
| touch file | create blank file |
| alias II='Is -l' | alias for Is -I |
| unalias Is | unset existing alias |

| find . -size 10k -print | files over 10Kb |
| :--- | :---: |
| find . -name "*.txt" -print | find text files |
| find /foo -type d -ls | list all directories under /foo |
| less file | display file page by page |
| sed s/foo/bar/g file | replace "foo" with "bar" <br> sed -i s/foo/bar/g file (-i: update file) |
| strace -tfp PID | trace system calls for PID |
| tar cvf archive.tar file1 file 2 file3 | create tar archive |
| ssh user@host | log in to host as user |
| scp file.txt user@host: | copy file.txt to host as user |
| scp user@host:/tmp/file.txt /var/tmp | copy /tmp/file.txt from user |
| at host to /var/tmp locally |  |
| cd - | return to previous directory |
